

Fleur Slabbinck

Software Developer

About

Motivated Game Development graduate skilled in C++ and C#, Unreal Engine, Unity and .NET. Passionate about gameplay programming and software development with a strong drive to learn and refine skills.

Education

Howest – Digital Arts and Entertainment Kortrijk, Belgium
Bachelor Game Development September 2022 – June 2025
Obtained cum laude

KU Leuven Ghent, Belgium
Bachelor & Master Architecture September 2017 – June 2022
Completed 90% of Bachelor

Don Bosco College Wijngaarde Wijngaarde, Belgium
ASO Latin Maths September 2011 – June 2017

Experience

Februari 2025 – June 2025 Wijngaarde, Belgium

Internship - IDLab-MEDIA

Immersive Virtual Reality football simulation in Unity aimed at enhancing patient engagement during rehabilitation.

- Gained experience with Virtual Reality development and integrating full body motion tracking.
- Assisted with research of Ghent University's rehabilitation and physiotherapy sciences group on the impact of gamification on patient motivation and recovery process.
- Implemented communication over network between VR simulation and WPF application.

September 2024 – December 2024 Kortrijk, Belgium

Robotopia

Group project in Unreal Engine 5 (C++) in partnership with MyMachine Vlaanderen where we collaborated with children from an elementary school class to make their dreams come true.

Winged Warfare

A co-op multiplayer game as a group project in Unreal Engine 5 (C++).

Custom Engine & Bomberman

A C++ 2D engine for arcade style games, demonstrated with a Bomberman recreation.

Personal Projects

Projects in my free time to improve my skills and explore new programming patterns, languages and tools, for example: continuing work on my custom engine, exploring fun game concepts, IoT projects ...

Skills

● = Proficient

○ = Some Experience

Development

- C++
- C#
- .NET
- WPF
- CSS3
- HTML5
